# SAFE-HIT

## SOIL ANCHORED DELINEATORS

### OVERVIEW

Safe-Hit's complete line of durable & flexible, soil anchored posts provide delineation and enhance motorist safety on public and private roadways. Typical applications include guide posts, culvert markers, median crossovers, and mile markers.

Safe-Hit's flexible posts rebound from multiple impacts, and are constructed of durable linear low density, co-extruded polyethylene with ultraviolet inhibitors. They are available with portable bases, surface mount bases or soil anchors. Safe-Hit posts feature a two piece, self-locking system that reduces installation and maintenance costs. If the Safe-Hit post is damaged, replacement is quick and easy.

### FEATURES AND BENEFITS

- ▶ A unique two part system incorporates the use of a permanent anchor and a replaceable post.
- ▶ 1-3/4" inner tube provides superior rebound capability.
- ▶ Tubular, galvanized anchor is available in various lengths to accommodate different soil conditions.
- ▶ Posts that come in a variety of heights, shapes and colors to accommodate different reflective configurations.
- ▶ Unlike STEEL posts, these FLEXIBLE posts cause minimal damage to impacting vehicles while reducing personal injury.
- ▶ The post is easily replaced without having to reinstall the existing anchoring system.
- ▶ Numerous reflective and decal options available.
