SALES • RENTALS • INSTALLATION

G P Roadway Solutions is Hawai'i's leading provider of roadway, personal, and industrial safety solutions. We are the only full-service distributor of construction equipment and traffic control rentals with offices on all four major Hawaiian Islands.

With full-service warehouses located in Honolulu (O'ahu), Pu'unene (Maui), Kailua-Kona (Hawai'i Island), and Līhu'e (Kaua'i), we are strategically positioned to serve customers statewide. Our sales reach spans across all Hawai'i and extends throughout the Pacific region.

Our journey began in 1978 as Safety Equipment and Sign Company. Over the years, we have grown to meet the evolving needs of the construction industry. In 1991, we rebranded as SUN Industries, operating three divisions: Safety Equipment and Sign Co., Unistrut Hawaii, and National Barricade. In 2002, we expanded further by acquiring Peterson Sign Company. Today, G P Roadway Solutions offers a full range of services including material sales, rentals, and installations. We have been part of the Grace Pacific LLC family since 2003. Grace Pacific was acquired by Alexander & Baldwin in 2013, and later by Nan Inc in 2023.

Locally Owned & Operated Since 1978

Sales: Sales of safety equipment & supplies.

Construction: Installation of guardrail, signs, road striping, and chain link fencing.

Rental: Rental of traffic control, construction equipment, and temporary fencing.

Application of protective sealants, sealcoating, HVAC protective coating, parking lot maintenance.

Manufacture and installation of custom signs, plaques, banners, event signage, and vehicle wraps.

Sales and installation of Unistrut metal framing, mezzanines, and prefabricated buildings.

Guardrails

NU-GUARD-31 Guardrail - Valtir

MASH approved, RIB-BAK U-channel posts available in galvanized and powder coated, for roadside and median applications.

TGS Guardrail - Valtir

With the 31" system height, the W-beam attaches directly to the post, and does not use offset blocks. MASH approved Test Level 3.

Barriers

CASS S3 M10 - Valtir

A cable barrier system. The post employs a unique wave-shaped slot, which works in tandem with a strategically positioned, widened cable spread designed to help restrain various types of vehicles that impact the system. MASH crash test standards.

End Terminals

4F-T (4 Foot Flared Trend Terminal) - Valtir

MASH approved, flared, single-sided, redirective/gating and energy-absorbing guardrail end terminal for use in roadside and shoulder installations to include approach or departure applications.

CET CASS End Terminal - Valtir

A redirective/gating cable end terminal, for use with Valtir's CASS® S3 M10 in either unidirectional or bidirectional traffic applications.

SOFTSTOP System - Valtir

A tangent, single-sided, energy absorbing, redirective and gating end terminal. During head-on impacts within MASH criteria, the SoftStop System is designed to dissipate energy by the head traveling down the anchored W-Beam panels.

MASH Approved

MATT Median Attenuating TREND Terminal - Valtir

MATT is a tangent, double-sided, redirective/gating and energy-absorbing attenuator/end terminal, for use with various longitudinal highway barriers in either unidirectional or bidirectional traffic applications.

MASH Approved

MSKT - Road Systems Inc.

RSI's new MSKT (MASH-compliant Sequential Kinking Terminal) is an energy-absorbing tangent terminal that is MASH TL-3 compliant. During head-on impacts, the MSKT head slides over the W-beam guardrail. The rail is sequentially kinked as it moves through the impact head. The kinked guardrail exits its head, and the vehicle is brought to a controlled stop.

Crash Cushions

MASH Approved

QuadGuard Elite M10 - Valtir

A redirective, non-gating crash cushion that consists of a flex-belt nose, and high-density polyethylene (HDPE) cylinders surrounded by a framework of steel Quad-Beam panels. Available in 24" or 69" wide configurations and has transitions to concrete barrier, guardrail, and other roadside hazards.

MASH Approved

Available as 69" Wide Option

QuadGuard M10 - Valtir

A redirective, non-gating crash cushion that consists of an engineered steel nose and crushable, energy absorbing cartridges surrounded by a framework of steel Quad-Beam panels. Tested to the MASH Level 3. QuadGuard M Wide is available.

MASH Approved

REACT M - Valtir

A redirective, non-gating crash cushion that consists of 6 high-density polyethylene (HDPE) cylinders attached to steel backup and base track assembly. Tested to MASH 16 test level 3.

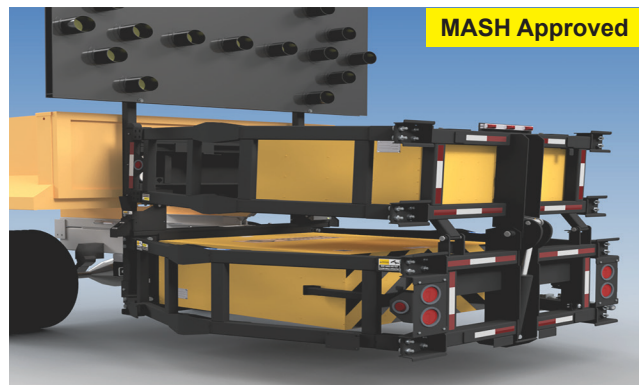

MASH Approved

Energite III Crash Cushion System - Valtir

A non-redirective crash cushion that consists of a configuration of sand filled modules. Designed for versatile use, serving as a durable barrier in permanent traffic control setups, temporary work zones, or as protection for stationary objects in areas with minimal traffic activity.

Impact Attenuators

MASH Approved

SS180 M Truck Mounted Attenuator - Valtir

Two lightweight aluminum cartridges contained in a potentially reusable steel support frame, and a 180° tilt feature which folds at the center to stack the two cartridge sections on top of each other. Tested to MASH test level 3.

MASH Approved

Vorteq M - Valtir

MASH approved trailer-mounted attenuator. It is comprised of a lightweight tube frame rail and a wheel/ axle assembly.

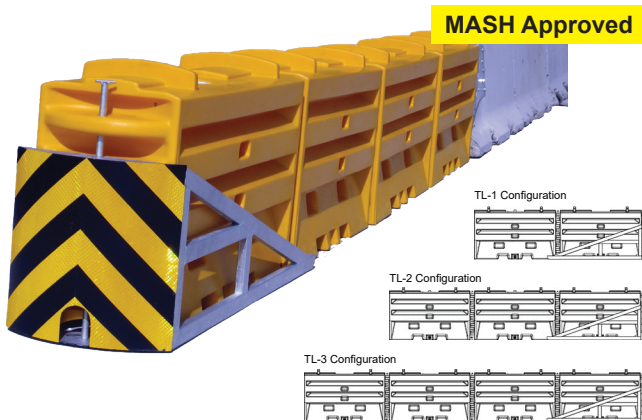

MASH Approved

SMT Trailer Mounted Attenuator - Valtir

The system is comprised of two lightweight aluminum cartridges contained in a steel support frame and heavy duty Torflex® axle and wheels. Tested to MASH test level 3.

AASHTO & FHWA, as of 2016, require equipment to be tested under MASH to qualify for federal aid from FHWA. MASH (Manual for Assessing Safety Hardware) is a uniform guideline for crash testing permanent and temporary highway safety features. This manual encourages consistency in testing and evaluation of roadside safety features.

MASH Approved

SLED TL-1, TL-2, TL-3 - Traffix Devices ^R

Sentry Longitudinal Energy Dissipater is a water-filled non-redirective gating crash cushion that is MASH approved.

Traffix Devices Inc.
Engineered Products for Safer Highways

MASH Approved

SLED MINI - Traffix Devices ^R

Sentry Longitudinal Energy Dissipater is a water-filled non-redirective gating crash cushion that is MASH approved.

Barriers

HighwayGuard Barrier - Valtir [®]

A portable, longitudinal redirecting steel barrier made of lightweight, galvanized steel segments. It is tested to MASH 16 Test Level 3 and Test Level 4. The HighwayGuard™ Barrier can be used in work zone applications with other compatible end treatments such as the QuadGuard.

Sentry Water-Cable Barrier - Traffix Devices [®]

MASH approved, eligible as TL-3 longitudinal barrier applications. Molded into each Sentry are four (4) 3/8" (9.5 mm) diameter galvanized stranded steel cables.

Water-Cable Barrier - Traffix Devices [®]

Built with three galvanized steel cables for added strength, the Water-Cable Barrier resists vehicle penetration on impact. Hinges allow up to 30° pivot and feature a double-wall knuckle design to reduce breakage. Each section connects securely with a galvanized steel T-pin.

Barricades & Accessories

Water-Wall - Traffix Devices [®]

Water-filled barrier that is a durable side protective temporary crash barrier system. Durable polyethylene systems are MASH approved. Molded forklift holes for easy transport.

ADA Strongwall or ADA Pathcade Barricade System - Plasticade [®]

Pedestrian barricade systems with unique base used without sandbags. Or an exclusive tripod leg system for use without sandbags. Light and stackable for easy storage. Shelves allow for standard barricade lights. Meets ADA and MASH requirements.

6ft Airport Low-Profile Barricade (white or orange) [®]

Barricade is 96" L X 10" W X 10" H and includes alternating orange & white high intensity reflective sheeting. Available with solar-powered high-intensity barricade lights.

R = Available for Rentals

Traffic Cones & Delineators

Portable Delineators R

In a variety of sizes, colors for all needs. Open, T and Ring top with caution tape knob and reinforced bolt hole for warning lights. Reflective sheeting & 8, 10, 12, 15, & 18 lb. base options.

Traffic Cones & Barrels R

In a variety of sizes, colors for all needs. 7 sizes from 2" to 36" with or without reflective sheeting. Vinyl one-piece construction. MUTCD compliant, Logo screen printing available. Common traffic cone sizes:
 12" orange
 18" with and w/o reflective sheeting, orange
 28" with and w/o reflective sheeting, orange
 36" orange

Type I, II & III Barricades R

Galvanized steel legs, durable boards with orange & white striped sheeting can be stenciled with name and logo. MASH accepted. Accepts barricade lights.

Barricade Tape

Manufactured for durability, these barricade tapes are ideal for marking dangerous areas with special instructions.

Crowd Control Galvanized Steel Barricade R

Interlocking crowd control barricades for sporting events, construction barriers.

Solar & A/C Barricade Lights R

High-intensity LED barricade lights are specifically designed to meet or exceed MUTCD requirements and ITE specifications. Optional power sources: solar & A/C powered, 6-volt battery powered and rechargeable systems. Available in sequential flashing systems.

Collapsible Traffic Cone

Five 28" cones with storage bag. Rugged black 8 lb. rubber base. Water-resistant solid nylon material with 6" upper & 4" lower cone reflective collars.

Telescoping Cone Bars

Bars come in reflective orange or yellow. 2 sizes adjustable from 4' to 7' or 5.5' to 10'. Holes on either end to slip onto traffic cones.

Slow/Stop Paddles

Rigid stop/slow paddles are available in both 18" and 24" octagon versions with reflective and non-reflective surfaces.

Flags

18" square, orange, vinyl traffic warning flag with 24" wooden dowel handle.

Road Flares

30 Minute flares with or without stands. Waxed with plastic cap, 36 /box.

Safety Lighting Products

Sequential Smart LED Flares - pi-Lit

Sequential flashing pattern automatically turns on/synchs flares and has 50K# crush strength. Rechargeable battery in sets of 4, 6, or 10, with magnetic holder.

Traffic Baton LED

Pack of two 11" batons, detachable flashlight, uses 3 AAA batteries. Detachable orange casing. Bright flashlights can be seen for 1/2 mile.

LED Road Flare Kit - AerVoE

Four flares with 18 LEDs, 7 flashing patterns, waterproof, floats, with magnetic backing. Kit includes 4 flares, 8 AA batteries, hex wrench, and soft sided case.

Baton Traffic LED Flare Kit

Red, amber or blue handled baton with red, amber or blue flashing LEDs. USB rechargeable with 5 flash patterns. Sold in kit of 3 or individually. Waterproof, crushproof, floats, built-in magnet to attach to metal surfaces.

WHELEN®

Vehicle Safety Lighting - Whelen Engineering

Lightbars, lightheades, beacons, control consoles, sirens, back-up alarms, for construction, first responders and security vehicles.

Signal Light

Bright LED lights with magnetic base for easy attachment. 26 bright LEDs, multiple flash patterns, 4 AA battery powered, safety cone bracket available.

Directional Arrow Lights

Bright LED lights with magnetic base for easy attachment. 4 flash patterns, use as traffic baton, USB rechargeable cord included.

Portable Lighting

Compact Light Towers - Wanco R

Compact design takes up less space when shipped or stored. Fold-up tow bar reduces footprint when stored. Brightest LED and tallest towers of any compact tower. Wanco units have the most reliable designs with easy access service doors, and security features to prevent vandalization. Available with metal halide lights, LEDs, or balloon lights.

Laydown Light Towers - Wanco R

Tower rises to 30 feet with two winches when deployed. State-of-the-art technology provides superior illumination with a choice of metal halide lights, LEDs, or balloon lights. Control panel features hour meter, a choice of convenience outlets for powering external equipment, and circuit breakers for on/off functionality and protection. Wanco units have the most reliable designs with easy access service doors, and security features to prevent vandalization.

LED Balloon Lights - AIRSTAR

Light up large areas with diffused light, eliminating glare. Five models are available with telescoping stands. These balloon lights include Bluetooth connectivity, individual and group lighting controls, remote dimming, and beacon and strobe/pulse effects. Available for installation on diesel light trailer or mounted to equipment.

Battery-Powered Light Tower - Wanco

Li-ion battery light tower delivers 360-degree bright LED lighting of 110,000 lumens. Rechargeable, lithium-ion batteries provide plenty of power and is charged with any 120Vac power source.

Programmable Solar Light Tower - Wanco

Ultra-bright LED lights can be individually programmed for automatic operation from 10-100%. A 7-inch full color touchscreen controller enables customizable autonomous operation.

Runway Closure Marker

Runway Closure Marker - Wanco * R

Portable runway markers certified to FAA AC 150/5345-55A. High efficiency LED lights are visible at long distances. Diesel powered with trailer.

Portable Traffic Signal

Portable Traffic Signal - Horizon Signal Technologies R

The NEMA Type TR1 SQ3TS Trailer-Mounted PTS is the most dynamic and dependable signal available today. With an industry-leading 100-mph wind load, and a 25-year design life, it is the temporary traffic control workhorse that you can rely on year after year. Up to 30 day run time on batteries.

SQ2 Portable Traffic Signal - Horizon Signal Technologies R

The SQ2 PTS system is the ideal work zone tool for daily or short-term projects. 5-7 days of operation on a single charge. Available with solar powered and remote-control options.

Arrow Boards

W|ECO Arrow Boards - Wanco R

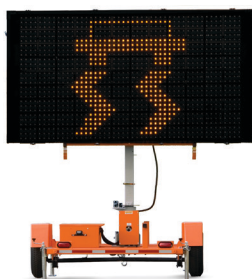

Folding frame boards are highly dependable, & visible from a mile or more. High-efficiency LED lights and sealed batteries, exclusive to Wanco, consume 85% less power than those used on traditional arrow boards. These arrow boards need fewer, smaller batteries than traditional arrow boards. Connected arrow boards can be accessed remotely using Wanco Fleet Manager.

Truck Mounted Arrow Boards - Wanco

Provides the ideal solution for convoys, crash-cushion (TMA) trucks, and emergency repair crews. Available in four sizes, with the same features as our trailer-mount models, Wanco's proprietary LED design provides wide angularity and superior visibility. Wanco also has the largest selection of mounting options.

Portable Message Board

Matrix Message Signs - Wanco R

Full-size, Mini & Metro sized full-matrix signs are the ideal choice when you need to get inform the public. The matrix allows the greatest flexibility for displaying any type of message — large or small letters, graphics, and symbols. Perfect for a wide variety of applications, a multitude of functions and options make these signs extremely versatile.

Fold-n-Go Trailer Signs

Fold-n-Go Standard Trailer - Wanco

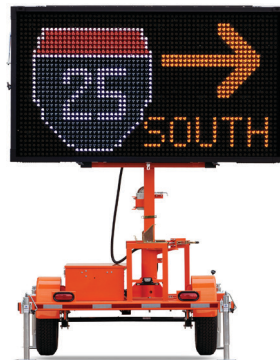

Provides a platform for temporarily displaying regulatory signs, alerting motorists of a work zone or other hazards. Shorter than our Tall and XT models, this compact and portable trailer offers effortless transport, easy roadside placement, and quick deployment in just minutes.

Driver Feedback Signs

Radar Feedback Sign Trailer - Wanco

Provides an effective tool in decreasing speeds in urban communities, on highways, in school zones, construction sites or special events. A portable radar sign, operating on solar power or batteries can be moved from place to place. Law enforcement, variable speed, and folding units available.

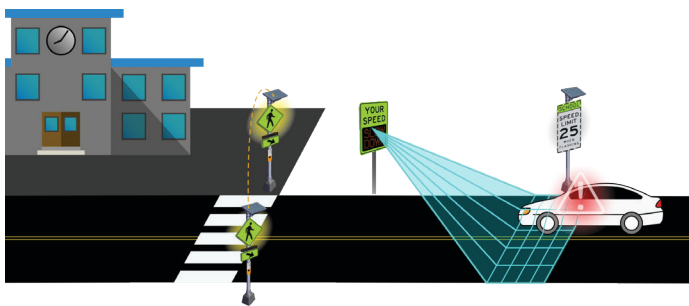

Electronic Traffic Devices

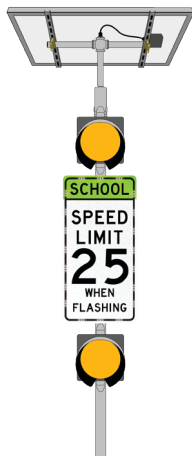

Driver Feedback Signs - TrafficCalm

Radar speed detection signs offer driver speed awareness to help prevent accidents. MUTCD compliant systems can be pole mounted or on portable stands. Solar or AC versions with battery in 9", 12", 15", or 18" models depending on conditions. Supports optional data tracking and wireless setup through Bluetooth or IR.

Intelligent Warning Systems - TrafficCalm

Retrofit existing signs with programmable flashing signs with radar detection. The controller receives input from a user-generated schedule, an optional radar, or a combination of both, to provide active LED flashing of the existing regulatory speed sign. The Basic Controller provides exceptional variability of blinking patterns and speed threshold settings, all from any smartphone, tablet, or PC.

Sequential Flashing Chevrons - TrafficCalm

LED outlined chevrons attach to existing signs for fast installation. Solar powered with radar detection for either direction notification. Wireless radio provides sequencing.

Flashing Sign Systems - TrafficCalm

Flashing Sign Systems using bright LED lights attached to signs will alert drivers of hazardous situations. Can be radar activated, is programmable 24/7, solar or AC powered, and Wi-Fi setup. Can be used for school crossing, wrong way detection, push to cross, emergency mobility and more. Easy to retrofit onto existing signs.

Push 2 Cross Flashing Sign System - TrafficCalm

Bright LED RRFB and Edge-it flasher ring lights around the signs alert drivers of pedestrians waiting to cross. The push button system is ideal where traffic lights are not present. It is programmable, solar or AC powered, and Wi-Fi setup. No hotspot or additional software required.

Signage

Construction Signs

Roll Up Signs

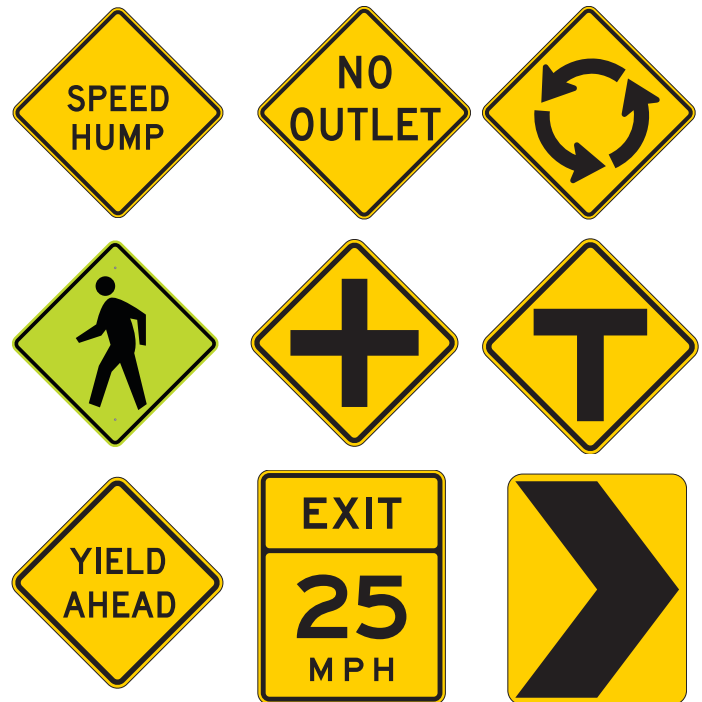

Roll-Up Signs

Available in a variety of materials and sizes, roll-up signs offer full size signage in a lightweight and easy to store design.

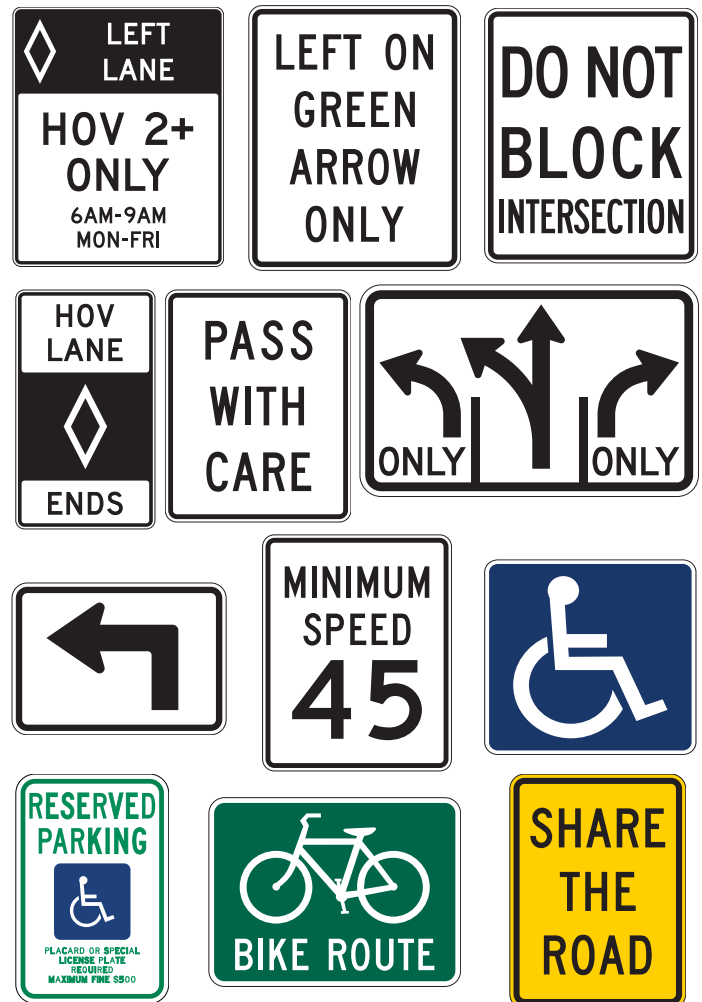

- Meet MUTCD requirements
- Many standard & custom legends and materials available
- MASH compliant
- Fiberglass cross bracing to prevent blooming and painful splinters
- Back-to-back hook and loop strap for storage
- Optional flag holding systems available
- Overlays for changeable message signs

Sign Posts & Hardware

Sign Post Hardware

U-bolt assemblies, brackets, nuts, straps and more are all made from heavy duty aluminum or steel for trouble free years of faithful service. We have kits for round, square tube mounting or surface mounts.

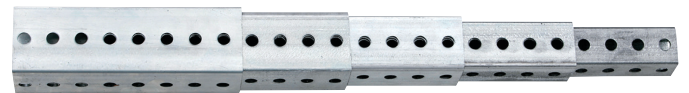

Frangible Ground Mounted Sign Assembly

NCHRP 350 compliant breakaway sign mount is easy to reinstall with a single shear bolt set. Holds a 2" square post and made in America. The Kleen Break frangible base typically only requires a shear bolt set to be replaced, which is much less costly than replacing a frangible casting.

U-Channel Signposts

Heavy duty galvanized steel posts in 12 or 16 ft lengths. Meets MUTCD standards for signposts. 3/8" holes on 1" centers to easily attach signs.

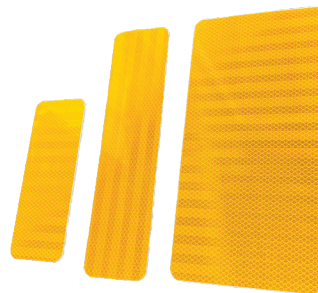

Square Signposts

Pre-punched holes for signs to attach to all 4 sides. Complies with the ASTM specification A635, and hot dip galvanized conforming to coating designation G90 for excellent corrosion prevention. Comes in 12 or 14 gage steel
 12G - 1.5" x 6, 8, 12 or 14 ft.
 12G - 1.75" x 6, 12, or 24 ft.
 12G - 2" x 10, 13, 14, or 24 ft.
 12G - 2.25" x 3, 4, or 24 ft.
 12G - 2.5" x 1.5, 10, 12, or 24 ft.
 14G - 2" x 10, 11, 12, 14, or 24 ft.

Sign Posts Reflectors

Heavy duty aluminum reflectors with high-intensity reflective sheeting. Rounded corners & pre-punched holes for easy handling and installation.

Pavement Marking & Bike Lane

Safe-Hit Delineator Posts - Valtir

Constructed of flexible and durable co-extruded polyethylene with ultraviolet inhibitors. It is self-certified as a NCHRP Report 350 and MASH Category 1 Device and tested to NTPEP.

Tuff Curb & Tuff Curb XLP- Impact Recovery Systems

A durable, high performance traffic separator curb that is compatible with Impact Recovery's flexible posts and panels and other traffic safety products. Integral coloration makes Tuff Curb & Tuff Curb XLP (low profile) highly visible and resistant to UV damage and fading.

Tuff Post Flexible Delineator - Impact Recovery Systems

Flexible delineator for lower speeds. Available in 3" & 4" diameters & 28", 36", 42", & 48" heights. Yellow, orange & white. With new 1/4 turn base.

Omegapost 2.375" - Impact Recovery Systems

A durable, high-speed performance traffic separator delineator post that is MASH approved. Built to last - constructed of a proprietary thermoplastic that is resistant to damage from UV light, ozone, and hydrocarbons.

MP2 Post - Impact Recovery Systems

The MP2 Post is a flexible polyethylene traffic delineator used for lane separation, bike lane protection, and urban traffic control. Its compact design makes it ideal for areas with limited space, such as pavement drop-offs and opposing traffic lanes. With new 1/4 turn base.

In-Street Pedestrian Crosswalk Sign

Highly reflective crosswalk sign with stop or yield options. Single or double sided options. Yields fully upon impact. In street mounting or on rubber base.

Pavement Marking

Custom Preformed
Design Service Available

Preformed Thermoplastic - Ennis Flint by PPG

Safe and easy to apply in a variety of shapes, colors and even custom image designs. Easy melting formula is retroreflective and skid resistant. Facility is ISO 9001:2015 certified. HotTape, PreMark and PreMarkXF come in 90 mil and 125 mil.

Traffic Paint - Ennis Flint by PPG

Fast drying, exceptionally durable paint for parking lots, streets, and highways.

Thermoplastic Pavement Marking - Ennis Flint by PPG

User safe compounds contain pigment, glass beads, binder & filler.

Glass Beads

Reflective glass beads to embed into traffic paint, signs and pavement marking tape. Recycled glass.

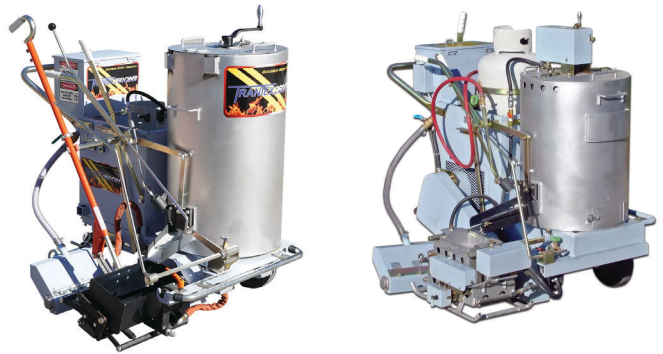

Temporary Pavement Striping Tape

Wet reflective or construction grade tapes are aluminum based with hi-index glass beads that are weather resistant.

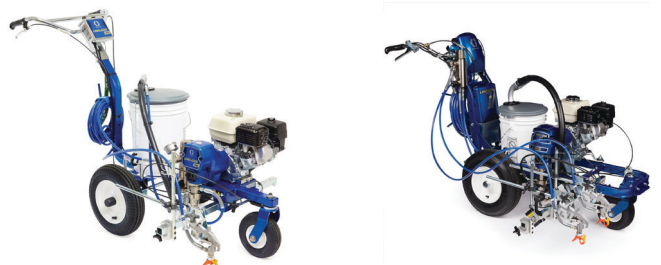

Pavement Markers

Retroreflective plastic, ceramic, solar powered & chip seal temporary pavement markers in a variety of colors & shapes.

Thermoplastic Applicators - Trantex

Variety of models. Quick Melt system allows increased productivity without the need for external pre-melter. A variety of guns with self-powered Hydrostatic Drive.

LineLazer Airless Striper - Graco

Dependable striping systems for small projects or larger units for miles of road striping. With digital Display with SmartControl features. Automatically stripe skip-lines. Auto-Layout measures while you walk. Easy gun adjustment and vibration reduction system.

Battery Stencil Rig, Scarifier & Accessories - Graco

We are full line Graco dealer with the most popular items in stock. With knowledgeable staff to help with your project.

Parking Stops & Speed Bumps

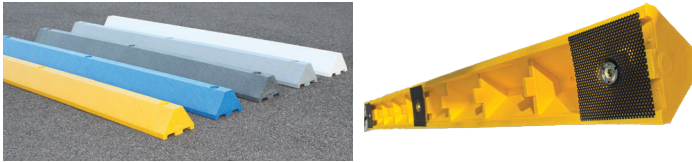

Concrete Parking Stops

With forklift holes for easy placement. Two holes for 16" spikes sold separately. 72"W x 8"W x 8"H.

Rubber Parking Stops

100% Recycled rubber with in-molded reflective yellow or white tape. Pre-drilled holes for anchor spikes. Available in 4' or 6' lengths. In Black, blue, and yellow. 6"W x 4.5"H

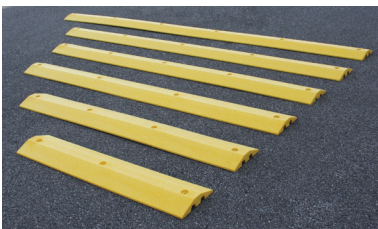

Plastic Parking Stops

High-Density-Polyethylene parking stops in black, white, blue, gray, & yellow. 8"W x 72"L x 4"H. With 3 anchor spikes. **New Anchor Plate** for adhesive mounting without drilling into concrete.

Rubber Speed Bumps & Speed Humps

100% Recycled rubber with molded highway reflective tape and "Cats Eye" reflectors. Speed Bumps come in black or yellow with pre-drilled holes. 4' or 6' lengths. 12"W x 3"H. Optional endcaps. Speed Humps come in 19.7"L. Middle & endcap sections both are 35.4"W x 2"H

Plastic Speed Bumps

100% Recycled low-density plastic polyethylene solid yellow. In 4', 6', or 9' lengths. 12"W x 2.25"H

Bollards

Bollards & Sleeve Protectors

Steel, aluminum, and stainless-steel bollards of all sizes and configurations. HDPE plastic sleeve protectors with a variety of colors.

Guardrail system

One or two-line rails, steel pipe rail sleeved in durable HDPE plastic.

Slow Stop Rebounding Bollard - Impact Recovery Systems

Able to tilt up to 20 degrees while absorbing energy and returns to upright position. Easily installed with 4-8 concrete screws. No damage to concrete flooring. 4", 5", or 6" diameter units can stop large trucks with no damage to facility.

Misc. Facility Maintenance Products

Convex and Dome Mirrors

One of the simplest and most effective ways to reduce accidents is with mirrors. These acrylic hardback or galvanized back mirrors come in several shapes to suit your situation.

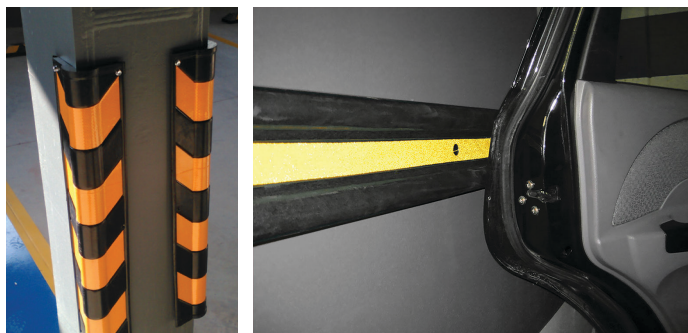

Parking sign

Narrow plastic sign-stand with 9 or 20 lbs rubber base. 8"W x 36"H

Plastic A-framed Sign Stand

Heavy duty plastic sign frame with wheels. Holds two 24" x 36" signs. Hidden sand fill ports for up to 10lb. of dry sand.

Corner and Wall Protectors

Protect buildings and property with these rugged safety-yellow, high-impact virgin rubber guards maintain their appearance with no painting or upkeep required.

Asphalt Cold Patch

Bond-X Green Cold Patch Asphalt Repair - Seaboard

A greener option for asphalt pothole repair because it contains renewable, biodegradable formula to replace petroleum derivatives normally found in cold patch.

- **ZERO VOCs**
- Qualifies for Environmentally Preference Purchase guidelines
- Biodegradable Asphalt Softener
- Permanent Repair
- Recycled Content
- Year-Round Application
- Open to Traffic Immediately
- 100% Recyclable Bags

Detectable Warning Systems

ADA Warning Pads - Detectable Warning Systems

ADA tactile warning mats with 5-year warranty are made in a variety of durable materials to suit your need.

- RediMat - Flexible polyurethane with peel & stick installation.
- AlertTile - Glass reinforced thermoset composite tile.
- AlertCast - Cast in place reinforced thermoset composite tile (replaceable).
- AlertCast PAVER - Cast in place, glass reinforced thermoset composite panel (non-replaceable).
- CastIron - Plates designed to withstand snow removal equipment.

Striping, Marking Paints & Equipment

Survey Flagging Tape

Printed, patterned, day/night, adhesive, and biodegradable varieties of tapes.

Detectable Warning Tape

Detectable and non-detectable burial tapes available. Variety of colors that are made to last with specs exceeding industry standards. Standard sizes 3" or 6" widths and 1000' lengths. Printed with permanent inks that last a lifetime, variety of APWA colors available.

Striping & Marking Paint

Assorted colors and sizes for asphalt, cement & turf. Spray cans, & 5-gallon sizes. Both waterborne and solvent formulations.

Measuring Wheels

RT Series provides reliable measurements on counter tops to sidewalks, construction sites, and rough terrain. Aluminum telescopic handle.

Marking & Striping Sticks

36" long striping stick with a new ergonomically designed trigger and grip. For use with striping paints.

Pavement Striper - Aervoe

Lightweight, yet heavy-duty aerosol striping paint applicator. Stripe widths up to 4"

Stencils

Custom stencils for your parking lot maintenance needs.

Erosion Control

Ultra-Flood Stopper

Sandless sandbags absorb water to provide a barrier. In bag and tube styles. Engineered consistency.

Unfilled Sandbags

- A. UV stable woven polypropylene that can withstand sun & weather.
- B. Burlap bags made with jute fabric and hold 40# of sand.

Stormwater Filtration

9-ft long filter sock to remove petroleum & pollutants.

Ultra-Gutter Guard RT

Recycled rubber filter media features a high-flow overflow weir that prevents ponding during extreme wet weather events, while its high-flow outer filter efficiently removes contaminants from the stormwater flow.

Dewatering Bag

Contain silt, sediment & oil pumped out during dewatering operations.

Drain Guard

Geotextile fabric removes oil, sand and litter before it gets into the storm drain.

Grate Guard

Geotextile fabric slips over grate to remove sediment. No need to remove the grating to clean.

Compost Filter Sock

It is easy to install and filter out sediment and petroleum for BMP compliance. Made from bio-based recycled material.

Drain Inlet Filters

Filter sock with PVC piping and weight to keep it in place.

For Drainage

For Paving

For Lining Ponds

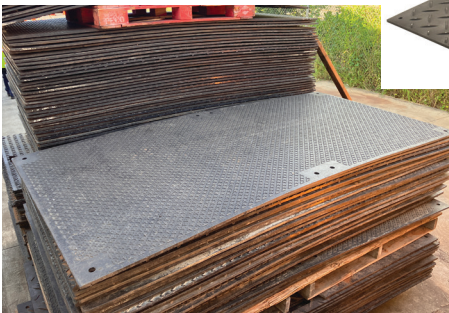

Bulk Bags

Geosynthetic Products

High strength woven & non-woven geotextiles for paving and stabilizing embankments to reduce contamination and containment.

Ground Protection

Ground Protection Mats ^R

High-density polyethylene mats resist oil and chemicals to prevent heavy equipment and pedestrian traffic from damaging lawns and the environment.

Pedestrian Trench Covers

Fiberglass composite covers with anti-slip surface that weighs 62lbs & handles up to 500lbs. Smooth rubber edge. Covers 27.5" trench. Dim 44.3" x 44.3"

Track-out Grates & Plates ^R

Rumbling motion shakes loose debris from trucks and construction equipment. Durable steel grates.

Steel Plates ^R

For rent or sale. 6' x 12' or custom size.

Temporary Fencing

Dust Screen with Chain-Link Fencing Rental ^R

Free standing or mount onto water-filled barriers or concrete barriers.

Silt Fence with Posts

3' or 2' X 100'. Polypropylene fabric lets fluid pass while trapping soil.

Safety Warning Fence & 6' Green fence post

Lightweight barriers in a variety of sizes & lengths. Green & orange.

Trench Safety

Trench Shoring - Griswold Machine & Engineering **R**

GME has the world's most complete line of trench shields and trench shoring equipment. We offer a range of systems, from a single hydraulic shore system, trench shields, slide rail systems and the MD Brace system - hydraulic bracing system. We have popular items for rent as well as custom ordering.

MD Bracing System

Lite Shield **R**

Slide Rail Linear System

Height Adapter with Steel Trench Shield

Manhole Box

Clear Span Slide Rail with Tiebacks

Hydraulic Aluminum Shield with End Loadable Struts **R**

Hydraulic Vertical Shores **R**

Trench Shield **R**

2AEX Aluminum Trench Shield

Slide Rail with Pit Configuration

Consultation Available

Experienced engineering staff to provide the best trench protection.

Gas Detection

Multi Gas Clip Simple

4-Gas detection with 2-year run time. No charging, no calibration necessary. 2-Year Warranty.

Official Distributor
of

Portable Gas Detectors You Can Count On

Multi Gas Clip Dock

Test up to four units simultaneously. Easy to use one button operation. Rechargeable battery that lasts up to 1500 tests.

Single Gas Clip Plus

Rugged, dependable and maintenance free. Hibernate mode allows you to spread 2 years of use over a 3-year period.

Multi Gas Clip Simple Plus

4-Gas detection with 3 year run time. No charging, no calibration necessary!

External Pump

Extract air samples from up to 75 feet away.

blacklinesafety

24/7 Safety Monitoring - Blackline Safety

Blackline Safety has combined gas detection and lone worker protection in an easy to monitor and use system. New **EXO Area Monitor** the world's only direct-to-cloud area monitor for up to eight gases plus gamma radiation.

- Real-time safety monitoring
- Reliable connectivity
- Advanced sensor portfolio for gas detection
- Layers of communication
- Robust reporting & analytics
- Streamline & scale with ease
